

CLIMATE DESIGNERS

Aristocrat

Material

The radiators are composed out of steel vertical collectors and horizontal straight steel radiation tubes. The Aristocrat of high quality stainless steel. The radiation tubes are by means of the “resistance welding” procedure connected with the collectors. No welding seams are visible either at the collector nor at the radiation tubes.

An electric element can be installed.

For central heating wet system / electric only / mixed application (mixed).

> pressure test: 10,3 bar

> working pressure: 8 bar

Composition

Single, round radiation tubes (ø 18 x 1.5 mm) welded horizontal at the vertical round collector (ø 38 x 1.5 mm), with a distance of 18 mm.

With on a regular distance open spaces to dry towels or linen.

Colour

The Aristocrat is available in two versions: [gloss polished](#) / [brushed satin stainless steel](#).

Connection

The settled sockets 1/2” at the bottom end of the collectors. Air vent 1/8” at the side end of the collector.

Output in watts, measured in accordance with EN 442.

How to install

The building services engineer chooses the radiators considering following conditions:

- A heat output calculation according to the standard.
- The heat output and the dimensions of the radiators according to EN 442.
- The radiators may be wall mounted when using the wall fixings supplied.
- The specially designed thermostatic connection sets / [thermostatic Jaga Deco](#) / [Jaga-Pro valves](#) / [manual Jaga Deco valves](#) can be connected to [plastic central heating service pipes](#) / [RPE/ALU. tube](#) / [copper tube/ steel pipe](#).
- [Jaga thermostatic heads](#) / [Jaga Deco thermostatic heads chrome](#) / [Jaga Deco thermostatic heads chrome/white](#) / [Jaga Comap thermostatic heads silver](#) / [not to be](#) / [to be fitted](#).

Options

- [Jaga Deco valves](#).
- [Electric heating element](#).
- [Electric heating element with infrared operation](#).
- [T-pieces for mixed application](#).
- [Insert pipe for top end connection](#).
